Los Angeles

I am a senior front-end UI developer with a background in graphic design. Working exclusively as a remote team member, I excel at ultra fast PSD-to-Code conversions, responsive development, Wordpress theme creation, front-end views for custom SaaS projects and cloud apps, and optimizing Shopify stores. I am enthusiastic about good code, simplicity and user experience. I have a special interest in projects that help improve communities, film, and small dogs. I'm highly personable and excellent at managing client expectations. It's easy to get in touch with me via telephone, Hangouts or email.
